

IOWA MEDICAID

MATERNITY MANAGEMENT PROGRAM

Congratulations on your pregnancy!

It is important that you take good care of yourself during this time. Good care makes a difference in your health and the health of your baby.

Iowa Medicaid has a special program for its pregnant members. It is called the Maternity Management Program. This program gives you support, education and counseling by telephone. The goal of the program is to have a healthy Mom and baby.

You qualify for the Maternity Management Program if you:

- Have had previous maternity complications.
- Have any medical conditions that may cause your pregnancy to be at high risk.

Your participation in the program is voluntary and at no-cost to you.

I have questions and/or concerns, who do I contact?

When you are pregnant, you are part of a team. That team includes you, your baby, and your healthcare provider. The Maternity Management Program adds a Health Coach to your team. Our Health Coaches are trained in Maternity care and are here to work with you and your healthcare provider. Health Coaches are ready to answer your questions and guide you through this special time.

If you would like to speak to an Iowa Medicaid Maternity Management Program Health Coach, call:

1-515-256-4606 (in the Des Moines Area)

1-800-338-8366 (outside of the Des Moines Area)
